

Save The Model

The model is saved with .h5 extension as follows
An H5 file is a data file saved in the Hierarchical Data Format (HDF). It contains multidimensional arrays of scientific data.

```
[ ] model.save('fruits.h5')
```

```
[ ] ls
```

```
drive/  fruits.h5  sample_data/
```

```
[ ] import numpy as np
    from tensorflow.keras.models import load_model
```
